(a)
Smallest change giving 2 × tumour exposure
PEG density p
diameter d (nm)
(b)
Zoom near the original particle
all-data fixes
(tight cluster)
PEG density p
diameter d (nm)
minimal fix per draw, no tumour data
minimal fix per draw, all data
original particle (d = 200 nm, p = 0.2)
robust fix, all data (P_success = 0.92)
robust fix, no tumour data (P_success = 0.80)
true minimal fix
measured formulations
